

Interim
report
Q1 2019

About BRABank ASA

BRABank is a Norwegian consumer bank with business activities in Norway and Sweden. The bank operates on a banking license issued by The Norwegian Ministry of Finance on May 7, 2018. Late June 2018, BRABank opened for business in Norway. The bank's activities in Sweden are organised as a cross-border operation with all bank-related activities run from the office in Oslo.

BRABank's ownership structure, IT solutions and competence amongst key employees are the main elements behind the ambition of becoming a "Travel and Retail Bank". A scalable IT-system, supplemented by user centric digital design, facilitates product and geographical expansion as well as high quality customer experiences.

Initially, BRABank has established itself on the Norwegian market with a consumer loan product, distributed through brokers, and a savings product. In Q4 BRABank launched the BRA Mastercard in Sweden, in cooperation with Braathens Regional Airlines. Consumer lending in Sweden was launched in March 2019. The bank has decided to postpone the introduction of a savings account product in Sweden until further notice.

The regulatory framework in our current markets, particularly in Norway, has been tightened over the latest few months. BRABank's credit policy is fully compliant with the existing guidelines from the Norwegian FSA.

BRABank is a member of the Norwegian Banks' Guarantee Fund, which secures all deposits from Norwegian customers up to 2 million NOK and 100 thousand EUR from Swedish customers. The BRABank share

was listed on Merkur Market at Oslo Stock Exchange on the 29th of August 2018.

At the end of Q1 2019, the bank employed 12 FTE at the office at Skøyen, Oslo. The limited number of employees is made possible by extensive use of outsourcing partners in the areas of accounting, IT, marketing, credit vetting and customer service.

Braganza AB is the major shareholder in BRABank ASA, holding 19,38% of the outstanding shares.

Friday 8th of February 2019 it was announced that the Board of Directors of Monobank ASA and the Board of Directors of BRABank ASA had signed an agreement to merge the two banks into one, with Monobank ASA as the acquiring entity. Six days later a merger plan was approved and signed by the two Boards of Directors. The merger plan was approved by the shareholders of both banks in general meetings on the 20th of March 2019. An application to merge the two banks has been filed with the Norwegian FSA. Until the application has been approved it is "business as usual" for both banks, with no form of cooperation between the two. This quarterly statement is based on a going concern assumption for BRABank ASA as a standalone enterprise.

Highlights in the quarter

Q1 was the third quarter of operation for BRABank. The major event of the quarter was the announcement of merger plans with Norwegian consumer bank Monobank ASA.

- On February 8, the plans to merge BRABank ASA and Monobank ASA was published. The plans were approved by the annual general assembly of both banks on March 20.
- Launch of consumer loans in Sweden deploying a network of six well reputed brokers of various sizes
- Successful trial period completed with Lendo, the largest broker on the Norwegian market for consumer loans

Key figures	
(NOK million)	Q1 2019
Net loans	191.9
Net interest income	2.4
Operating costs	(23.4)
Profit (loss) b. tax	(26.7)

Operational statement

The shift towards larger brokers in Norway allowed the bank to increase its loan sales volume in the quarter by 46% compared to Q4 2018. Processes and routines at our outsourcing partners, Lindorff and Affinion, are increasingly getting better resulting in higher efficiency and scale advantages. With a larger portfolio available for analysis, changes were made to the composition of cooperating agents. Over time, we believe this will increase the credit quality of the loan portfolio. Another result of the analytical work in the quarter, was the increase of the minimum age for a Norwegian loan customer from 20 to 25 years.

In Sweden, the consumer loan was fully launched in March, just over a month after schedule due to a longer than expected soft-launch period. First indications are

positive in terms of the market's reaction to the product and the onboarding procedure.

From an operational perspective, BRA Mastercard is performing well, and the continued onboarding process improvements are showing positive results as we now see a higher number of customers completing their application than at the early stages of the launch. Overall recruitment to the card is well below our expectations and we continue to test new marketing channels as well as fine tuning the marketing communication to the various target groups. Preparations are ongoing to test "face-to-face" sales at Bromma airport and indications are that we launch this initiative in Q2.

Financial Review

BRABank commenced banking operations late June 2018 and has since the start applied the Simplified IFRS reporting standards. For reference and interpretation of these standards, the IFRS principles and standards were fully accounted for in the Q3 2018 report and the annual report of 2018.

Quarterly credit sales amounted to NOK 120 million (69 million), leaving a net loan balance of NOK 192 million (97 million) at end of quarter. The bank launched consumer loans in Sweden mid-March 2019. Credit card balances at end of quarter amount to SEK 7 million (3 million). To secure sufficient funding of lending activity the bank raised its deposit rate to 2.15 % in February 2019. Customer deposits volumes increased to NOK 590 million (51 million) at end of quarter.

Liquid assets at end of quarter amount to NOK 35 million of unrestricted deposits with credit institutions and NOK 562 million in securities. Total liquid assets corresponded

to 70 % of total assets at end of quarter. The liquidity coverage ratio (LCR) is 202 % (464 %) at the end of the quarter, well above the minimum requirement, which is 100 %.

Net interest income amounted to NOK 2.4 million (1.9 million), while net commissions and fees amounted to NOK -0.7 million (-0.5 million). Net yield for securities amounted to NOK 1.2 million (0.3 million). Operating expenses amounted to NOK 23.4 million (17.8 million). These expenses include NOK 5.2 million of due diligence - and other merger preparation activities.

Gross defaulted loans (stage 2 + stage 3) at the end of Q1 amounted to NOK 23 million (10 million). No loans have yet been written off as final loss by end of the quarter. Loan impairments amounted to NOK 11.8 million (6 million). According to IFRS9 the bank must make loss provisions on new loans and other non-defaulted loans (stage 1) based on probability of default (PD). Stage 1 provisions at NOK 4.9 million constitute 2.8 % of all non-defaulted loans at end of quarter. With almost no historical data to support expected credit losses (ECL) in the portfolio, the bank has applied original credit scoring values, benchmark data and early-stage customer behaviour data to calculate relevant PD and loss given default (LGD) ratios.

Result after tax is a deficit of NOK 26.7 million (20.7 million). Total assets amounted to NOK 845 million (326 million). Total equity amounted to NOK 234.6 million (261.2 million). Total capital ratio, as well as CET1 ratio, was 45.3 % (131.4 %). The bank targets a CET1 ratio above 18.0 % and a total capital ratio of 21.5 %.

Outlook

The planned merger with Monobank ASA means less focus on business and product development than what would normally have been the case. However, until the merger has been finally approved by the Norwegian FSA, BRABank continues to focus on the day-to-day operation of the bank and to serve our customers and partners the best way possible.

In Norway, we plan to stay at the current level of new loan volumes and focus on continuously improving the quality of the loan portfolio. The positive early signs from sales of consumer loans in Sweden indicate there is a potential of significantly increasing the bank's total assets. However, as there are inherent risks involved when launching a new credit product in a new market, the bank will take necessary steps to control growth and maintain a high level of credit quality in the portfolio.

A merger process represents numerous challenges to an organization. In addition to carrying on with "business as usual", the staff at BRABank is also deeply engaged with preparations for the merger. Workstreams have been established and it is expected that as we get closer to the expected merger date, the focus will increasingly shift towards merger related tasks.

Notes

Note 1 – Financial instruments

Financial instruments at fair value

According to IFRS7 financial instruments at fair value should be measured at different levels.

Level 1: Financial instruments in level 1 are determined based on quoted prices in active markets for identical financial instruments available on the balance sheet date.

Level 2: Financial instruments in level 2 are determined based on inputs other than quoted prices, but where prices are observable either directly or indirectly. These include quoted prices in markets that are not active.

Level 3: When valuation cannot be determined in level 1 or 2, valuation methods based on non-observable market data are used.

Securities	31.03.2019	31.03.2018	31.12.2018
Securities - Level 1	562 083	-	150 853
Total securities at fair value through profit and loss	562 083	-	150 853

The bond portfolio consists solely of shares in Bond Funds, managed by Norwegian asset managers. The portfolio is held for liquidity management purposes, and to satisfy CRD IV requirements regarding liquid assets and minimum Liquidity Coverage Ratio requirement.

Note 2 – Loans to customers

Loans to customers at EOP consists of unsecured consumer lending to household customers in Norway and Sweden, as well as credit card lending to consumers in Sweden.

Consumer loans: Loan amount kr 20.000 - kr 500.000. Maximum tenure is five years. Pricing is risk based, with a minimum interest of 7.95 % and a maximum of 19.95 %.

Credit card lending carries a maximum credit limit of SEK 100.000. Interest rate is fixed at 18,90 %.

Loans to customers (NOK '000)	31.03.2019	31.03.2018	31.12.2018

Past due 60 days	5 125	-	4 259
Past due 90 days +	9 575	-	5 606
Total lending balance	197 250	-	99 928

Stage 1: A new credit exposure is initially recognised in Stage 1. If there is no significant increase in credit risk at next recognition, the exposure stays in Stage 1. The applied initial PD ratio for a Stage 1 credit shall reflect the probability of default within the next 12 months. The initial (12 months') PD is produced by the scorecard provided by Bisnode, reflecting large quantities of observed relevant default data over many years, at the time of on-boarding.

Stage 2: If there is a significant increase in credit risk since previous reporting period the exposure will be re-classed to Stage 2. Back-stop for Stage 2 assessment is the second reminder, which is presented 42 days past due. The applied PD ratio for Stage 2 exposures shall reflect the probability of default over the full lifetime of the exposure. The full exposures move back from stage 2 to stage 1 once they no longer meet the criteria for a significant increase in credit risk.

Stage 3: If credit risk deteriorates further and the financial instrument is assessed to be credit-impaired, the financial instrument is moved to Stage 3. Back-stop for Stage 3 exposures is unpaid 90 days past due. The applied PD ratio for Stage 3 exposures shall reflect the probability of default over the full lifetime of the exposure. If there is no evidence supporting that the PD should be lower, the applied lifetime PD for Stage 3 exposures is 1 (100 %).

*) Q1 2019 costs include 5.2 mNOK of merger preparation costs

Note 9 – Related parties

The only one related party of the bank is Braathens Regional Airlines AB ("BRA"). This company is fully owned by Braganza AB, which hold 19.38 % of the shares of BRABank ASA. The nature of the relation with BRA is a cooperation agreement to issue co-branded loyalty/credit cards to the customers of the airline. The bank pays a royalty fee of 0.7% of interest bearing balances to the airline, as well as a SEK 250 reward per BRA customer that signs up for a credit card with the bank. Transactions between the parties are part of daily operations and at arms length prices.

Transactions (NOK '000):

Counterpart	Period	Sales to related party	Purchase from related party	Amount
Braathens Regional Airlines AB	Jan-Mar 2019	-	Royalty and reward	567

Transactions with related parties included in the balance sheet (NOK '000)

	31.03.2019	31.03.2018	31.12.2018
Debt to related parties	96	-	445

Note 10 – Intangible assets

<i>(Amounts in NOK '000)</i>	Q1 2019	Q1 2018	Full year 2018

Additions			
Setting up BRABank core banking system for Norway and Sweden at the Scandinavian Data Centre in Denmark		-	26 316
Development of the digital customer front-end system	2 943	-	12 680
Connecting BRABank to the Norwegian national clearing and settlement infrastructure (NICS)		-	6 304
Setting up BRABank for international credit card issuing, BankID and electronic archives at Nets		-	1 488
Other start-up investments		-	278
Public tax relief for R&D activities ("SkatteFUNN")		-	(2 304)
Amortised value of leased premises according to IFRS 16	2 798	-	-
Disposals	-	-	-
Intangible assets cost price at end of period	50 503	-	44 762
Cumulative depreciations at start of period	(6 450)	-	-
Write downs	-	-	-
Cumulative depreciation during the period	(4 165)	-	(6 450)
Cumulative depreciation at end of period	(10 615)	-	(6 450)
Book value of intangible assets at end of period	39 889	-	38 312

Value assessment

There are no identifiable parts of the revenue stream of the bank that can be tied to any of these investments, as they are all basic infrastructure investments to be able to provide financial services, such as lending and payments. A revenue-based assessment of the asset values is therefore not applicable.

The major share of this investment package (Core system + Digital Front-end) are tied to three-year contracts - hence a 36 month depreciation profile has been decided. On an on-going basis there will be future needs for new functionality, upgrades, maintenance and re-design. An economic lifetime of these assets could be projected to be 3-5 years.

No impairments have been recognised for the intangible assets in the period. Although the announced merger plan of Monobank and BRABank indicates that the combined bank shall run its operations on the Monobank platform and solutions, it is still to soon to translate the announcement into financial transactions in the BRABank accounts.

Note 11 – Share owners

Face value of the company shares is NOK 6,50. All shares have the same share class and voting rights. If the merger with Monobank is completed the shareholders of BRABank will receive 9.25 Monobank shares for every BRABank share.

On 23-Feb-2018, 1,500,000 independent subscription rights [warrants] were issued to the existing shareholders of the company. The rights are freely tradable. Subscription can be exercised 1-Mar-2021, 1-Mar-2022 and 23-Feb-2023. The BoD can decide to accept exercise of subscription rights at other dates, but no later than 23-Feb-2023. Subscription price is set at NOK 23,50 + 5 % step-up per year proceeding 23-Feb-2018. If the merger with Monobank is completed the warrants will be converted to independent subscription rights in Monobank, under the same terms and conditions.

May 2018 the company established a three-year stock option programme for the management team. Strike price of the options was based on the planned share issue price (NOK 23,50) as stated in the IPO and the Black and Scholes's option pricing model. Strike price is stepped up by 5 % yearly. First possible exercise date was 23-March-2019. No options were exercised at that date. If the merger with Monobank is completed the options will be converted to Monobank share options under the same terms and conditions.
